Subject: Enterprise Fish Pump

Hi Brendan,

In relation to your call yesterday, I would like you to know that we are absolutely delighted with our new fish pump. We previously had a Rapp pump, and after hearing the reports from other boats with the Seaquest pump improving their quality, thought we would give it a try. The results were outstanding, with the factory reporting far less bloodspots in the fish with the result that the Japanese inspectors passed a much larger percentage of the fish as suitable for their markets. As this resulted in better prices for us, we were both happy with the change. We have had this pump for a few years now and would have no hesitation in replacing it with a new one when we need it,

Regards Hamish Slater M/V Enterprise
